Lab 0 - Rubber Stoppers

Aaron Huang

February 11, 2026

1 Purpose

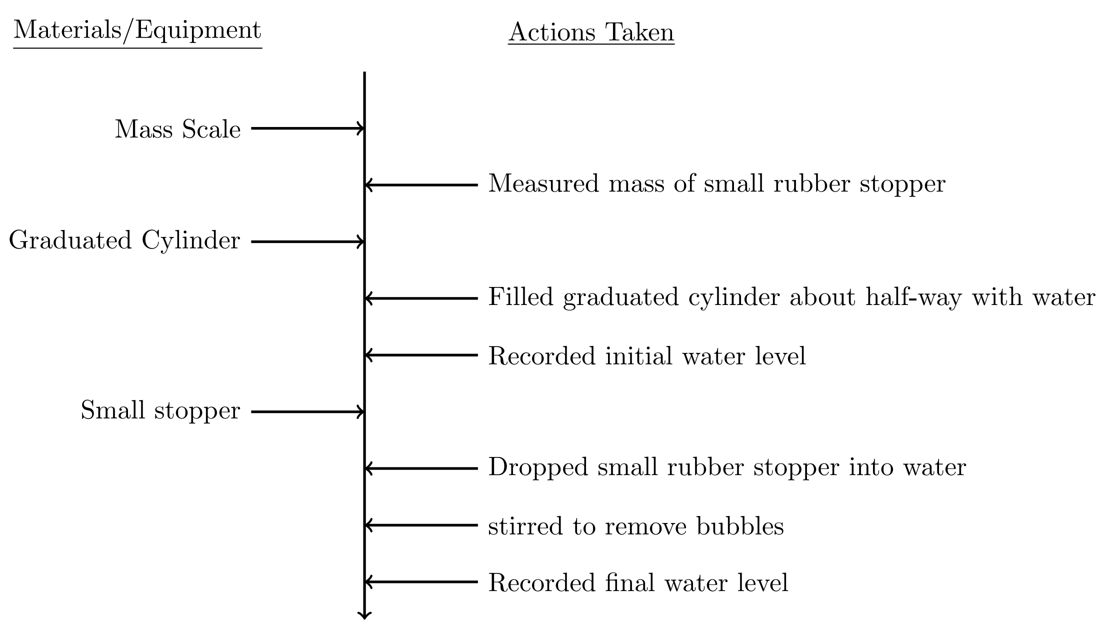
The purpose of this lab is to determine the density of two sizes of rubber stoppers and to write up a complete lab report using proper format.

2 Materials

- graduated cylinder (200 mL)
- two rubber stoppers (small & large)
- beaker (50 mL)
- beaker (250 mL)
- water
- mass scale
- dropper

3 Procedure

3.1 Part 1: Density of Small Rubber Stopper



3.2 Part 2: Density of Large Rubber Stopper

Materials/Equipment	Actions Taken
Mass Scale	
	Measured mass of large rubber stopper
	Measured initial mass of 250ml beaker
Beaker (50 mL)	
	Filled beaker most of the way with water
	Lefted enough space to move without spilling
Beaker (250 mL)	
Beaker (50 mL)	
	Placed beaker (50 mL) inside beaker (250 mL)
Dropper	
	Used dropper to add water to beaker (50 mL) until full
Large Stopper	
	Slowly lowered large rubber stopper into beaker (50 mL)
Dropper	
	Removed water from beaker (50 mL) to prevent spillage
Beaker (50 mL)	
	Removed beaker (50 mL) from beaker (250 mL)
Mass Scale	
	Measured final mass of beaker (250 mL)

4 Observations

Table 1: Observations of Rubber Stoppers

Rubber Stopper Size	**Mass (g)**	**Initial Measurement**	**Final Measurement**
Small			
Large
